Research and Publications

Most of Dr. Salzberg's current research and publications has been in the areas of breast reconstruction, the prevention and treatment of pressure ulcers and the treatment of burns. He has published some twenty-eight articles, contributed 6 book chapters and made dozens of national and international presentations.

Pioneering Research in Breast Reconstruction

In 2001, Dr. Salzberg pioneered the development of Single-Stage Breast Reconstruction with Implant and AlloDerm® Regenerative Tissue Matrix from LifeCell™. Since that time, he has presented his methodology to surgeons around the world.

All physicians in this section are paid consultants for LifeCell Corporation.

Important Information: Every patient is different and their reconstruction options and their results may vary. All depictions on the site are for illustration purposes only. Whether or not you have breast reconstruction is a decision you need to make in consultation with your physician. Only you and your physician can determine the best option for you. Please ask your doctor to explain the benefits and risk of various reconstruction options and whether they are right for you.
